Since our first formal meeting in March of 2002, we began the process of partnering people of faith in suburban and rural church settings with churches and organizations in urban settings - primarily along the “poverty crescent” in Rochester. The intent was to draw people together from the faith community, with differing backgrounds and racial diversity to impact existing ministries and agencies with support through volunteering and finances.

Our belief is that by working together, we strengthen and have a greater impact on our community, but also in this process the walls and barriers dividing us denominationally, racially and in class begin to fall. Additionally, we sought to create a forum for greater communication of what programs can be a shared responsibility cross denominationally. This process began to occur from the onset of the organization and continues in an even more prolific way presently.

As you can see from our material, there is a volunteer opportunity that waits for any person willing to step forward. You know your strengths, passions and availability. Please consider joining our efforts.

The path is chosen and Lord has provided the steps. It's up to you to walk them.
